Oracle EPM 11.1.2 Talleyrand Release

Yesterday, Oracle announced the official launch of the Enterprise Performance Management 11.1.2 Release. This release introduces some major enhancements to the existing Hyperion applications, along with three new products – Disclosure Management, Financial Close Management and Public Sector Planning and Budgeting.

I've had the opportunity to see the release live during a partner launch event and have been very impressed thus far. Over the next few weeks, In2Hyperion will begin to look at this release and share how to take advantage of new functionality.

View the press release below.
