

PBCS Architecture

For those of you that know me, I have a little graphic designer in me. I frequently develop things that may be useful to others in the industry and like to share. Below are 2 images that you may use with the understanding that the logo has to remain and can't be re-branded. If you would like to have this customized and your logo added, contact me and we can discuss the options.

PBCS Architecture

I was asked to summarize the PBCS Architecture. Since this isn't proprietary, here you go.

Pizza As A Service

I won't take credit for this concept. You can find this all over the internet. I was a little bored and wanted to present the concept to a client so I decided to recreate it a little

more professionally. This compares software as a service (SASS) to pizza. Hope you can benefit from it and maybe get a few laughs.
